

rubitec ag

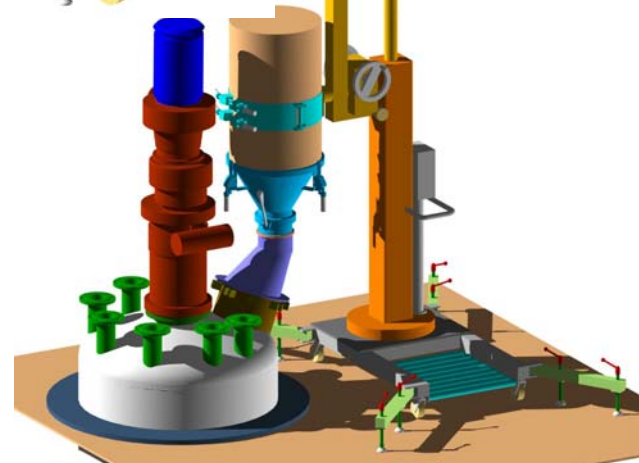

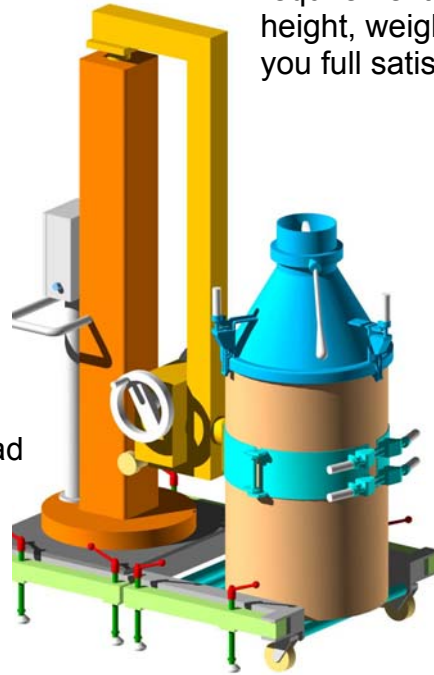

A tailored solution for lifting, tilting and swivelling.

We have achieved it by applying innovative solutions making use of proven components.

A highly skilled and motivated staff ensures that your special requirements regarding loads, height, weights will be realized to you full satisfaction.

- ▶ Versatile in the kind of load lifted
 - bins
 - hoppers
 - screeners
 - containers
 - barrels
 - your specification?
- ▶ Versatile system optimally adaptable to individual customer requirements
- ▶ Ceiling and floor supports interchangeable without turning the column over
- ▶ Safety provisions against power failure or hydraulic leakage

- ▶ Secure structural design
- ▶ Planning in 3-D

- ▶ No transmission of building loads onto the lifting column
- ▶ Electric control unit conforming to standards and employing standard components

- ▶ No cables or hoses outside the column
- ▶ Spatially separated levels for power supply lines and the guiding of the load

- ▶ Cable installation and column cabling according to standards
- ▶ No control components in the column as a rule
- ▶ Good accessibility and adjustment of limit switches and hydraulic components
